

X fly 1D mini

Cinema or live events with only two operators

XD motion now offers the X fly 1D mini with our XD cam Head 3 Axes, Gyrostabilized as a package.

The Mini X fly keeps your crew fast and small, requiring two operators to control all the functions of the cablecam, gimbal and lens.

XD cam Head will allow AR tracking for smooth motion shots on 3 axes thanks to its Gyrostabilized system. It is very easy to use thanks to its RF remote control.
